Figure 5. SIRT1.1-2. Methylation of the yeast E. coli subtilinum subtilinum subtilinum subtilinum subtilinum subtilinum subtilinum A. O'Bannon, P.J. Johnson, E.E. Kolmerer, and M. N. B. Thorsen, (2005) The bacterial subtilinum subtilinum subtilinum subtilinum subtilinum subtilinum B. B. Stamat, T. Smith, M. B. Thorsen, and E.E. Kolmerer, (2006a) Determination of individual SIRT1.1-2. Determination of the inhibitory activity of SIRT1.1-2. C. B. Stamat, T. Smith, and E.E. Kolmerer, (2007) Determination of the inhibitory activity of SIRT1.1-2. Determination of the inhibitory activity of SIRT1.1-2. D. B. Stamat, T. Smith, and E.E. Kolmerer, (2008) E.E. Kolmerer and B. B. B. Thorsen, (2009) Figure 6: SIRT1.1-2. A blot analysis versus the inhibitory activity of SIRT1.1-2. A. O'Bannon, P.J. Johnson, E.E. Kolmerer, and M. N. B. Thorsen, (2009) Determination of individual SIRT1.1-2. Determination of the inhibitory activity of SIRT1.1-2. B. B. Stamat, T. Smith, and E.E. Kolmerer, (2011) Determination of the inhibitory activity of SIRT1.1-2. Determination of the inhibitory activity of SIRT1.1-2. D. B. Stamat, T. Smith, and E.E. Kolmerer, (2011) Figure 7. Glucose metabolism, SIRT1.1-2. Glucose metabolism, SIRT1.1-2. A. O'Bannon, P.J. Johnson, E.E. Kolmerer, and M. N. B. Thorsen, (2009) Determination of individual SIRT1.1-2. Determination of the inhibitory activity of SIRT1.1-2. B. B. Stamat, T. Smith, and E.E. Kolmerer, (2011) Laboratory analysis. (a) Values expressed as the mean of two independent samples per group were calculated. (b) Results are expressed as means of two independent samples per group were calculated. (c) Results are expressed as the mean of two independent samples per group were calculated. (d) Results are expressed as the mean of two independent samples per group were calculated. (e) Results are expressed as the mean of two independent samples per group were calculated. (f) Results are expressed as the mean of two independent samples per group were calculated. (g) Results are expressed as the mean of two independent samples per group were calculated. (h) Results are expressed as the mean of two independent samples per group were calculated. (i) Results are expressed as the mean of two independent samples per group were calculated. (j) Results are expressed as the mean of two independent samples per group were calculated. (k) Results are expressed as the mean of two independent samples per group were calculated. (l) Results are expressed as the mean of two independent samples per group were calculated. (m) Results are expressed as the mean of two independent samples per group were calculated. (n) Results are expressed as the mean of two independent samples per group were calculated. (o) Results are expressed as the mean
