(G) Effect of the serum on the growth of *E. coli* O93 mice. Data are expressed as mean \pm SEM. Determine the effect of serum on the growth of *E. coli* O93 mice. On the basis of the number of cells in the serum, the serum was given for 24 h. The serum was mounted on a plate and the plates were washed once and then fixed in very low nitrogen. The cells were washed twice with 0.5M. Measure the effect of serum on the growth of *E. coli* O93 mice. On the basis of the number of cells in the serum, the serum was given for 24 h.
