Grant Marsh, Nicole Gates, Mark Pratt, Don Cordova

Harvard Medical School

The study was supported by the China Environmental Research Center (1190-410577); the China Fungal Science Research Center (10285-5899610); the Department of Biochemistry, China National Science and Technology Development Center (9266-416718); and the Jiangnan Medical School (9502-67758H), as well as the National Science and Technology Laboratory (9343-23237). The study was supported by a Brookhaven National Laboratory Grant for the experimental studies, a Grant from the National Science and Technology Research Center (11180-55240), and a Grant from the National Institute of Medical Research (7226-5112). The study was supported by a Graduate Research Fellowship from the School of Medicine at the University of Hong Kong.
