Longevity and dynamics of the pin-head larva head in the chilled-fur- endowed larval environment. Microbiology Letters, vol. 48, no. [30] Bhargavi V, Gopalakrishnan G, de Strijer A, et al. (2008) A novel mechanism for the 'death of the head: a synthesis of the larval immune system. PLoS One 8:e4616. [31] Dienneuve C, Dain V, Koppeenlach S, Cossette J, et al. (2008) A cryptic method for the identification of a mutant form of the larval flagellar metastasis gene, the toxin pKGIP1. PLoS One 8:e4713. [32] Brignon P, Plait J, Campbell PJ (2008) A novel amino acid substitution characterization of a gene family that includes the master toxin, pKGIP1. J Mol Biol 72:927-931. [33] Lefebvre S, Leskovitch K, Bélanger R (2008) An alternative splicing of the toxin pKGIP1 into the *Vibrio cholerae* tetraspanem. Genes Dev [34] Bélanger R, Lefebvre S (2007) A new enzyme in the tetraspanem: pTTP1, which converts a protein that is a protein of protein-protein interactions to a protein of complex interactions. Mol Biol Cell [35] Taggart J, Rampal S, Blassoni D, Schalk B, et al. (2009) A novel TAP- specific proteolytic enzyme, pTAP-1, which is a member of the family of Proteasomatidae. Mol Biol Cell 30:15-30. [36] Brignon P, Bélanger R, Brignon S, Lefebvre S (2007) A new amino acid protein with a novel protein structure, pTAP-1, which is a protein of intracellular glycoprotein interactions. Mol Biol Cell 30:9-10. [37] Dain V, Bélanger R, Cossette J, Campbell PJ (2008) A molecular model of the evolution of the parasite parasiteil [Editor: C. S. J.]. Biochimica et Biophysica Acta 78:291-299. [38] Cossette J, Campbell PJ (2007) A novel concept for the evaluation of the evolutionary evolution of the *T. vaginalis* TAP-1. Mol Biol Cell 26: [39] Dain V, Bélanger R, Cossette J, Campbell PJ (2008) A novel concept for the evaluation of the evolution of the *T. vaginalis* TAP-1. Mol Biol Cell [40] Brignon P, Bélanger R, Cossette J, Campbell PJ (2008) A novel concept for the evaluation of the evolution of the TAP-1. Mol Biol Cell 26:10-11. [41] Campbell PJ, Campbell PJ, Sierra J, et al. (2008) The evolution of the tetraspanem toxin pKGIP1 and its associated protein PIP1. Mol Microbiol [42] Salin R, Papazianou J (2010) Molecular evolution of the toxin pKGIP1. Confederacy of bacteria, vol. 2, no. 1:63-76. [43] Ritter M, Maris H, Schalk B, et al. (2011) A novel variant of the tetraspanem toxin pTAP-1. J Biol Chem 282: 3248-3382. [44] Zhang H, Zhao J, Yang L, et al. (2011) The influence of the toxins on the production of a new toxin, pKGIP1. J Biol Chem 282: 3248-3381. [45] Dain V, Bélanger R, Cossette J, Campbell PJ (2008) A novel concept for the evaluation of the evolutionary evolution of the *T. vaginalis* TAP-1. Mol Biol [46] Hsieh Y, Shi L, et al. (2009) Identification of an alternate, anionic amino acid protein of the parasite parasiteil. J Bacteriol 186:128-132. [47] Hsieh Y, Shi L, et al. (2009) Identification of an alternative amino acid protein
