treated or untreated CyaA-treated rats is not completely independent of the protein expression of urokinases in the urine. This observation is in accordance with the results of our previous study (17) where urokinase-1 expression was significantly higher in CyaAtreated rats than in control rats. Moreover, the presence of urokinase-1 mRNA was found to be associated with increased urine CyaA-induced CyaA- induced CyaA-induced urine CyaA-inducedtreated urine CyaA-treated urine CyaAurine CyaA-induced urine CyaA- induced urine CyaA-induced urine CyaA- treated urine CyaA-treated urine CyaAinduced urine CyaA-induced urine CyaA-treated urine CyaA-treated urine CyaAtreated urine CyaA-treated urine CyaA- treated urine CyaA-treated urine CyaAtreated urine CyaA-treated urine CyaA- treated urine CyaA-treated urine CyaAtreated urine CyaA-treated urine CyaA-treated urine CyaA-treated urine CyaAtreated urine CyaA-treated urine CyaA-treated urine CyaA-treated urine CyaAtreated urine CyaA-treated urine CyaA-treated urine CyaA-treated urine CyaAtreated urine CyaA-treated urine CyaA- treated urine CyaA-treated urine CyaAtreated urine CyaA-treated urine CyaA- treated urine CyaA-treated urine CyaAtreated urine CyaA-treated urine CyaA- treated urine CyaA-treated urine CyaAtreated urine CyaA-treated urine CyaA- treated urine CyaA-treated urine CyaAtreated urine CyaA-treated urine CyaA-treated urine CyaA-treated urine CyaAtreated urine CyaA-treated urine CyaA- treated urine CyaA-treated urine CyaAtreated urine CyaA-treated urine CyaA- treated urine CyaA-treated urine CyaAtreated urine CyaA-treated urine CyaA- treated urine CyaA-treated urine Cya treated urine CyaA-treated urine CyaAtreated urine CyaA-treated urine CyaAtreated urine CvaA-treated urine CvaAtreated urine CyaA-treated urine CyaAtreated urine CyaA-treated urine CyaA-
