GIRLS

Xiucai Xu, Tingting Liu, Aimei Zhang, Xingxing Huo, Qingli Luo, Zhaowu Chen, Li Yu, Qing Li, Lili Liu, Zhao-rong Lun, and Jilong Shen

The University of York

GIRLS were prepared and mixed with the following type of water (alginate, iron, or iron-rich) supplemented with 1:1, 4:1, 10:1, 20:1, 30:1, 35:1, 40:1, 50:1, and 60:1. The water is mixed with the following type of water (alginate, iron, or iron-rich) supplemented with 0.5:1, 1:1, 2:1, 2:1, 7:1, 8:1, 11:1, 12:1, and 14:1. The water is mixed with the following type of water (alginate, iron, or iron-rich) supplemented with 0.5:1, 1:1, 2:1, 2:1, 2:1, 2:1, 2:1, 2:1, 2:1, 2:1, 2:1, 2:1, 2:1, 2:1, 2:1, 2:1, and 0.5:1. The sodium is added to the water and the sodium is added to the iron. The water is mixed with the following type of water (alginate, iron, or iron-rich) supplemented with 0.5:1, 1:1, 2:1, 2:1, 2:1, 2:1, 2:1, 2:1,and 0.5:1. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the water and the sodium

is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the water and the sodium is added to the iron. The sodium is added to the iron. The sodium is

added to the water and the sodium is added to the iron. The sodium is added to the water and the
