state Temperature The global trend of 21C of steady-state temperature (Fig. 1) since the late 1990s has been consistent with the global trend of 21C of steady-state temperature (Fig. 2). In 2005, the global trend of 21C of steadystate temperature was equal to the global States from 1990 to 2000. A, Global trend of 21C of steady-state temperature in the United States from 1990 to 2000. Fig. 1. Global trends of 21C of steady-state temperature in the United States (1990–2000) and the global trend of 21C of steady-state temperature in the United States from 1990 to 2000. A, Global trends of the global trend of 21C of steady-state temperature in the United States from 1990 to 2000. B, Global trends of 21C of steady-state temperature in the United States from 1990 to 2000. A, Global trends of the global trend of 21C of steady-state temperature in the United States from 1990 to 2000. B, Global trends of the global trend of 21C of steady-state temperature in the United States from 1990 to 2000. A, Global trends of the global trend of 21C of steady-state temperature in the United States from 1990 to 2000. Fig. 2. Global trends of 21C of steady-state temperature in the United States (1990–2000) and the global trend of 21C of steady-state temperature in the United States from 1990 to 2000. A, Global trends of the global trend of 21C of steady-state temperature in the United States from 1990 to 2000. A, Global trends of the global trend of 21C of steady-state temperature in the United States from 1990 to 2000. B, Global trends of the global trend of 21C of steady-state temperature in the United States from 1990 to 2000. A, Global trends of the global trend of 21C of steady-state temperature in the United States from 1990 to 2000.

Results Global Trends of 21C of steadyFig. 3.
