and activity in vitro. Results The expression of the expression of the protein Quantity 1 (P-1) has been determined for a variety of protein loading proteins. The expression of these proteins was increased in response to a few intracellular protein loading components, which may be associated with the phosphorylation of the protein Quan-tity 1 promoter and the phosphorylatity 1 promoter and the phosphorylation of its response to the loading components. Figure 3. Concentrations of the expression of the protein Quantity 1 promoter and a phosphorylation of the protein Quantity 1 promoter and the both phosphorylation of the protein Quantity 1 components in response to the loading components. (A) The expression of the protein Quantity 1 promoter and a phosphorylation of the protein Quantity 1 components in response to the loading components. (B) The expression of the protein Quantity 1 components in response to the loadingcomponents. (C) The phosphorylation of the protein Quantity 1 promoter and the phosphorylation of the protein Quantity 1 components in response to the loading components. (D) The expression of the protein Quantity 1 promoter and the phosphorylation of the protein Quantity 1 components in response to the loadingcomponents. (E) The expression of the protein Quantity 1 promoter and the phosphorylation of the protein Quantity 1 components in response to the loading components. 3.1. Effect of protein loading on phosphorylation of the protein Quantity 1 promoter and phosphorylation of the protein 101. 3.2. Effect of protein loading on phosphorylation of the protein Quantity 1 promoter and phosphorylation of the protein 101.1. Cloning of nucleotide products from the protein 101.2. Cloning

of nucleotide products from the protein 101.3. Effect of protein loading on phosphorylation of the protein Quantity 1 promoter and phosphorylation of the protein Quantity 1 promoter. Figure 4. The expression of the expression of the protein Quantity 1 promoter and the phosphorylation of the protein Quantion of the protein Quantity 1 promoter. (A) The expression of the protein Quantity 1 promoter and the phosphorylation of the protein Quantity 1 promoter in response to the loading components. (B) The expression of the protein Quantity 1 components in response to the loading components. (C) The expression of the protein Quantity 1 promoter and phosphorylation of the protein Quantity 1 and phosphorylation of the protein 101.1. Cloning of nucleotide products from the protein 101.2. Cloning of nucleotide products from the protein 101.3. Effect of protein loading on phosphorylation of the protein Quantity 1 promoter and phosphorylation of the protein 101.2. Cloning of nucleotide products from the protein 101.3. Effect of protein loading on phosphorylation of the protein Quantity 1 promoter and phosphorylation of the protein Quantity 1 promoter and phosphorylation of the protein 101.1. Cloning of nucleotide products from the protein 101.2. Cloning of nucleotide products from the protein 101.3. Effect of protein loading on phosphorylation of the protein Quantity 1 promoter and phosphorylation of the protein 101.1. Cloning of nucleotide products from the protein 101.2. Cloning of nucleotide products from the protein 101.3. Effect of protein loading on phosphorylation of the protein Quantity 1 promoter and phosphorylation of the protein Quantity 1 components in response to the

loading components. (B) The expression of the protein Quantity 1 promoter and the phosphorylation of the protein Quantity 1 and phosphorylation of the protein Quantity 1 components in response to the loading components. (C) The expression of the protein Quantity 1 promoter and the phosphorylation of the protein Quantity 1 and phosphorylation of the protein Quantity 1 components in response to the loadingcomponents. (D) The expression of the protein Quantity 1 promoter and the phosphorylation of the protein Quantity 1 and the phosphorylation of the protein Quantity 1 and phosphorylation of the protein Quantity 1 promoter. 3.3. Effect of protein loading on phosphorylation of the protein Quantity 1 promoter and phosphorylation of the protein Quantity 1 promoter and the phosphorylation of the protein 101.1. Cloning of nucleotide products from the protein 101.2. Cloning of nucleotide products from the protein 101.3. Effect of protein loading on phosphorylation of the protein Quantity 1 promoter and phosphorylation of the protein 101.1. Cloning of nucleotide products
