12March2012RDI

Samithamby Jeyaseelan, Hong Wei Chu, Scott K. Young, Mason W. Freeman, and G. Scott Worthen

Louisiana State University

I thank Gail K. Carharti, Ph.D., for providing the CIBET data. I thank colleagues from the University of New York, for providing the CIBET data. I thank the National Cybersecurity Center for providing the CIBET data and for providing the CIBET coding systems. I thank Rani Matu, Ph.D., for providing the CIBET data and for providing the CIBET coding systems. I thank the National Institute for Advanced Technology in New York for providing the CIBET data. I thank the Department of Information Science for the CIBET data. I thank the Department of Information Science and Engineering for the CIBET data and for providing the CIBET coding systems. I thank the Department of Energy for the CIBET data. I thank the National Institute for Easier Energy and Environmental Emissions for providing the CIBET data and for providing the CI-BET coding systems. I thank the National Institute of Research on Nuclear Materials for providing the CIBET data. I thank the National Zentral Institute for providing the CIBET data. I thank the National Zentral Institute for providing the CIBET data. I thank the National Institute of Funding for providing the CIBET data. I thank the for providing the CIBET data. I thank the National Institute for Procedural Physics for providing the CIBET data and for providing the CIBET coding systems. I thank the National Institute of Fossil and Environmental Science for providing the CIBET data. II thank the National Institute for Medical Research for providing the CIBET data. II thank the National Institute for Fossil and Environmental Science for providing the CIBET data. II thank the National Institute for Environmental

Science for providing the CIBET data. II thank the National Institute for Electromagnetism for providing the CIBET data. II thank the National Institute for Experimental Physics for providing the CIBET data. II thank the National Institute for Fossil and Environmental Science for providing the CIBET data. II thank the National Institute for Materials Science and Engineering for providing the CIBET data. I thank the National Institute for Physiology, Biochemistry and Chemistry for providing the CIBET data. II thank the National Institute for Environmental Science for providing the CIBET data. II thank the National Institute for Mechanics, Technology and Materials for providing the CIBET data. II thank the National Institute for Industrial and Applied Science for providing the CIBET data. II thank the National Institute for Environmental Science for providing the CIBET data. II thank the National Institute for Materials Science and Engineering for providing the CI-BET data. II thank the National Institute for Experimental Physics for providing the CIBET data. II thank the National Institute for Materials Science and Engineering for providing the CI-BET data. II thank the National In-National Institute for Theoretical Physicsstitute for Mechanics, Technology and Materials for providing the CIBET data. II thank the National Institute for Materials Science and Engineering for providing the CIBET data. II thank the National Institute for Materials Science and Engineering for providing the CI-BET data. II thank the National Institute for Materials Science and Engineering for providing the CIBET data. II thank the National Institute for Materials Science and Engineering for providing the CIBET data. II thank the National Institute for Materials Science

and Engineering for providing the CI-BET data. II thank the National Institute for Materials Science and Engineering for providing the CIBET data. II thank the National Institute for Materials Science and Engineering for providing the CIBET data. II thank the National Institute for Experimental Physics for providing the CIBET data. II thank the Federal Bureau of Investigation for providing the CIBET data. II thank the National Institute of Materials Science and Engineering for providing the CIBET data. II thank the National Institute for Materials Science and Engineering for providing the CIBET data. II thank the National Institute for Materials Science and Engineering for providing the CIBET data. II thank the National Institute for Materials Science and Engineering for providing the CI-BET data. II thank the National Institute for Materials Science and Engineering for providing the CIBET data. II thank the National Institute for Materials Science and Engineering for providing the CIBET data. II thank the National Institute for Materials Science and Engineering for providing the CI-BET
